Education

- **City Montessori School** — Lucknow, India
  High School (11th & 12th Grade), ISC Board — *Apr 2026 – Apr 2028*
  - **Coursework**: Artificial Intelligence, Mathematics, Physics, Chemistry; ICSE Class 10 Board Score: 95.4%.
- **Lodha Genius – Ashoka University Programme** — Ashoka University
  Completed Programme, Science Track — *May 2026 – June 2026*
  - **Programme**: Completed the residential science programme; wrote the "chain reaction" essay series about the experience.

Experience

- **Synthica** — Remote
  Associate Editor, Computer Science — *May 2026 – Present*
  - **Selection**: Selected from 400+ applicants; 47 associate editors chosen across 8 categories.
  - **Editorial Review**: Reviewing computer science research submissions and evaluating technical quality for peer review.
- **City Montessori School** — Lucknow, India
  Vice President, HackSpace — *May 2026 – Present*
  - **Leadership**: Leading HackSpace, a student-run technology club for software development and hardware projects.
  - **Workshops & Projects**: Organising sessions across apps, web, games, Arduino, robotics, and 3D modelling.
- **Pilot** — Remote
  Chief Technology Officer (CTO) — *July 2025 – Present*
  - **Technical Leadership**: Leading development of an AI-powered Instagram automation platform for creators. Managing DM automation, lead responses, and deal tracking.
  - **Architecture & Stack**: Architected the full-stack app with Next.js, React, Node.js, PostgreSQL, Instagram API, and Gemini API.
- **Technical Writer** — Remote
  Freelance Technical Writer — *July 2025 – Present*
  - **DEV.to**: Built 35,000+ followers and 410,000+ views by writing about web development, AI, and programming.
  - **Earnings**: Earned $2,450 through technical writing, including $1,375 in 2025 and $500 from the Runner H AI Challenge.

Projects

- **NGTA**: NARS-guided transformer attention for clinical prediction under extreme missingness. Accepted at **NeSy 2026** and **GenAI4Health 2026**, a NeurIPS 2026 workshop.
- **MINTS**: Mechanistic interpretability for nucleotide transformers using probes, QK/OV analysis, patching, and SAE feature search. Submitted to GLBIO 2027.
- **PRISM**: Explainable T-48-hour conjunction-risk copilot for space monitoring. Submitted to Advances in Space Research.
- **MEN2 Predictor (INSEF Bronze)**: Medical ML pipeline: 97.20% accuracy and 100% sensitivity across 152 patients and 20 studies.
- **Analyzr**: Open-source analytics with one-line setup, real-time tracking, and custom events. Next.js, Supabase, TypeScript.

Achievements

- **AI Vulnerability Challenge**: **First prize**, Xavier University, Ohio, USA, with teammate Saksham Yadav. Awarded an 11-inch iPad (A16, 128GB).
- **Programs & Coursework**: Attended YC Startup School India and Summer 2026 FXB Climate Advocates Program; completed IYNA's 2026 Neuroscience I Capstone Track, including a research project and written research review.
- **Certifications & Competitions**: Harvard CS50x, CS50T, Ready Player 50; Puzzle Day 2024/2025 Gold. Three freeCodeCamp certifications. Top 25, Invisible Wars 2025; Top 100, HACKHAZARDS 2025.

Open Source & Writing

- **Merged contributions**: Grafana: XYChart point visibility, nested plugin unloading, asset cleanup. Tempo: module failure exit status. fish-shell: function query status. Also Notesnook, next-cloudinary, and Zero.
- **Personal essays**: "chain reaction", on the Lodha Genius Programme; "to my love about you", a new series on Medium.

Skills

Web / App
TypeScript, React, Next.js, Node.js, PostgreSQL, MongoDB, Supabase, Tailwind CSS

Research / Editorial
Research writing, peer review, editorial standards, technical writing

AI / Data
Python, scikit-learn, XGBoost, LightGBM, SHAP, pandas, NumPy, Gemini API

Leadership / Community
Team management, workshop planning, club leadership

Embedded / Hardware
ESP32, Arduino C++, I2C OLED, rotary encoder, DHT11, MQ-135, Wi-Fi/NTP, robotics, 3D modelling
